

Hermes E-Learning

Hermes Blended training

Our Hermes E-Learning

The HERMES 5 E-Learning course is available in German, French and English. Our HERMES 5 E-Learning course was developed by experts and transformed into an interactive and exclusive online training solution to prepare you for the HERMES 5 Foundation and Advanced exams.

Our HERMES 5 E-Learning course provides you with the basics for a common understanding of tasks, results and roles in a project.

This HERMES 5 Online solution also provides directly applicable tools in the form of templates and examples, which increases efficiency.

All this promotes a planned, structured approach and thus ultimately supports the success of the project.

In the course units, you gradually become familiar with the HERMES 5 project management method.

Finally, you can use an exam simulation to prepare optimally for the 'HERMES 5 Foundation' and 'HERMES 5 Advanced' certification exams.

5 reasons, why you will enjoy it

Scenario modules

1

In the scenario modules, you will deepen the exam-relevant standard scenarios with their standard modules.

2 Overview of the method structure

Our HERMES 5 Online solution is simply structured and self-explanatory. Get an overview of the structure and basics of the HERMES method.

HERMES 5 Exam Simulation

3

You can generate repeated sample exams from a collection of sample questions. The weighting of the topics corresponds to the exam specification.

4

Exam registration

Exam registration

Online exams take place via the ProctorExam software. With your personalized email address (which you provide when registering for the course), you will be invited by TÜV SÜD with a link to register/test. You can choose the date yourself.

5

Readings for application

Some key concepts of HERMES 5 are discussed in more detail in the documents. You can use these readings if you would like to learn more about the most important topics in the chapter "Notes on application".

- 6 months access
- 100%Online
- Exam included
